

Heritage

The history of the pecan predates the founding of our country, and pecans are embedded in American tradition, culture, and cuisine. Wild pecans were a staple in the diets of Native Americans, who originally referred to them as 'pecanes' and relied on their nourishing kernels as a major food source in the fall season.

After centuries of foraging wild pecans, Native Americans began planting pecan trees and trading their harvest to European explorers, who quickly became enamored and helped spread the lore-and-seed of this local delicacy.

Today, pecans are one of the few indigenous plants to have evolved into a highly-coveted and internationally-traded crop. U.S. growers produce nearly 60% of the world's pecan supply, with the state of Georgia accounting for one-third of the total U.S. supply.
